Art Unit: 3634

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4,7,10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lichtenstein 2,104,523.

Lichtenstein teaches the device claimed absent the plurality of racks. Note containers 14 and rack 10. To provide a plurality of racks for the purpose of holding more containers would have been obvious for one having ordinary skill in the art at the time of the invention.

Claims 2,3,5,6,8,9,11,12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar dispensing and display racks are illustrated by Chapman 1,752,369; Horwath 1,776,071; Berger et al. 2,922,552; Gorman 2,797,815.
